Message from the Chairman

IGAS 2022 was held for the first time in four years, as many exhibitions were cancelled due to the spread of COVID-19. The exhibition was held in Halls 1, 2, 3, 5, and 6 of the East Halls of Tokyo Big Sight, with 218 exhibitors in 1,876 booth units. Visitors numbered 33,078 over five days.

This year's IGAS 2022 featured a variety of events under the theme of "Venture into the innovation!"

IGAS LIVE TV featured freelance announcer Miho Ohashi as the special navigator, and included IGAS Topics, which introduced DAILY NEWS articles published every morning, IGAS Top Interviews, which interviewed exhibiting company executives, and IGAS Viewpoint, which introduced the theme zones by visiting the exhibition halls live on the official IGAS website. In addition, the same content was broadcast on large monitors installed in the galleria, bringing the entire exhibition to life.

The PANEL DISCUSSION and TOUR have become popular events at IGAS. Although the number of participants was lower than the previous show due to measures to prevent the spread of COVID-19, the archived video was broadcasted on the official website.

As with the previous exhibition, the Japan Printing Exhibition showcased all prizewinning works from various competitions held by the Japan Federation of Printing Industries and 10 member organizations for calendars, catalogs, bookbinding

design, packages, etc.

In the INNOVATIVE BUSINESS ZONE, exhibitors jointly exhibited and gave demonstrations to small and medium-sized printing companies, print buyers, and brand owners, offering tips for expanding their printing business.

Other events that were held included SMART FACTORY IGAS 2022 and Flexo Japan 2022.

Although the number of exhibitors and visitors at this year's IGAS 2022 was lower than the previous show due to the increase in COVID-19 infections leading to uncertainty regarding events like this, we were able to make our presence felt as a symbol of the revival of the printing industry in anticipation of the pandemic's end. We would like to take this opportunity to thank everyone for their support and cooperation.

Based on the results of IGAS 2022, we will do our utmost to meet your expectations for the next IGAS, and we look forward to your continued cooperation.

Japan Printing Machinery Association
Chairman Akihiko Morisawa

IGAS 2022, the International Graphic Arts Show, was based on in-person exhibitions, but also incorporated new styles such as virtual events, and provided information covering all processes from pre-press to post-press through discussions, seminars, tours, theme zones, and other events.

"Innovation" in the unifying theme "Venture into the innovation!" is a key word in the fields of pre-press and digital printing, which are the main areas our association is involved in.

At IGAS 2022, various proposals were made toward the construction of an optimal production environment, including collaboration among companies; despite the COVID-19 pandemic, 33,078 people visited the show.

As the theme of this year's exhibition suggests, the event provided an opportunity to find a new direction for the printing business.

Specifically, digital printing presses with improved productivity and quality, integrated workflows that link printing to delivery, and technological innovations such as AI and robots have pushed the implementation of smart factories forward in the printing industry.

The relevance of the field of digital printing presses has been increasing in tandem with improvements to functionality and quality, and the shift to total solutions with stronger linkage to post-press has progressed, now expanding into the field of flexible packaging.

Meanwhile, in the pre-press and workflow fields, the production flow from digital and offset presses to post-press has been optimized and visualized, and the integration of processes such as pre-press, printing, post-press, and delivery has been improving steadily.

In addition, proposals related to AI and robotics received a greater response than expected at IGAS. The recognition of these technologies as issues to be addressed by the printing industry was also a trend at this year's IGAS.

We will continue to contribute to the revitalization and development of printing media and the printing industry as a whole by providing products, services, and solutions that meet the needs of the printing industry while responding to the changing market environment.

We look forward to your continued guidance and encouragement.

Japan Association of Pre-Press and
Digital Printing Systems Suppliers
Chairman Shigenori Tsuji

- Official Event Name** IGAS 2022
International Graphic Arts Show 2022
- Purpose of Event** This event is a comprehensive international printing technology & solution exhibition that brings together the latest equipment, technology, and services related to pre-press, pre-media, printing, binding, paper processing, labels, packaging, and cross media. IGAS 2022 presents the latest technology and diverse solutions, offering a glimpse of the future of the printing industry. The event also promotes international exchange of business and human resources, and contributes to the revitalization and promotion of the printing industry and related industries.
- Theme** Venture into the innovation!
- Event period** Thursday, November 24 to Monday, November 28, 2022 [5 days]
- Event hours** 10 am to 5 pm (11 am 5 pm on the first day)
- Venue** Tokyo Big Sight East Exhibition Halls 1, 2, 3, 5, 6
- Number of exhibitors** 218 companies
- Scale of exhibits** 1,876 booth units
- Total exhibition area** 16,539㎡
- Number of visitors** 33,078
- Organizers** Japan Printing Machinery Association
Japan Association of Pre-Press and Digital Printing Systems Suppliers
- Supporters** (in no particular order) Ministry of Economy, Trade and Industry (METI), Tokyo Metropolitan Government, Japan External Trade Organization (JETRO), Japan Federation of Printing Industries (JFPI), Japan Society of Printing Science and Technology (JSPST), Japan Corrugated Case Association (JCCA), Japan Association of Graphic Arts Technology (JAGAT), Digital Content Association of Japan (DCAJ)

IGAS LIVE TV

Miho Ohashi, a freelance announcer, was the special navigator, and various content was streamed live on the official IGAS website. At the same time, the same content was broadcast on large monitors installed in the galleria. This helped to create a lively atmosphere at the exhibition. In addition, prior to the exhibition, a webcast titled "Upcoming IGAS" was launched on October 5 to introduce the highlights of IGAS 2022 and the event. After the exhibition, IGAS LIVE TV, PANEL DISCUSSION, and TOUR were archived and distributed as Thanks IGAS, as well as a comprehensive compilation of IGAS 2022. In addition, an e-mail magazine and press releases were distributed in conjunction with IGAS LIVE TV to attract visitors. IGAS LIVE TV was effective in appealing to visitors both in real and virtual terms, and the members of the IGAS Executive Committee and the promoters of each event appeared on the program to enliven the exhibition as a whole.

IGAS LIVE TV Opening & Message

Special navigator, Miho Ohashi, gave a message and broadcasted live coverage of the exhibition.

IGAS Topics

The latest information and highlights of IGAS were introduced in conjunction with the IGAS DAILY NEWS, which is published every morning during the exhibition.

IGAS Live Tour

The tour was streamed live and archived after the exhibition. Both Japanese and English versions were made available.

IGAS Insight

TOUR conductors provided easy-to-understand explanations of the latest technologies and solutions at IGAS 2022.

IGAS LIVE TV, PANEL DISCUSSION, and TOUR archives were distributed, as well as a compilation of IGAS 2022.

PANEL DISCUSSION

As the organizer's main project, a panel discussion on various themes was held in the Conference Tower of Tokyo Big Sight with a variety of guests including brand owners; a total of 379 people participated. The event was well received by the attendees, who were able to gain a deeper understanding of the latest printing technology trends and printing-related information, as well as explore new business opportunities in the printing industry.

TOUR

Guided tours were conducted for visitors to explain trends at IGAS 2022 by category and theme and to show the activity of the exhibition floor.

The Standard Course introduced an overview of IGAS 2022 and some of its highlights, and the Theme Focus Course focused on some specialized highlights established around various themes, with a total of 530 people participating. Although the max number of applications was much lower due to the COVID-19 pandemic, the event was highly evaluated by the participants. The tour was also archived on the official IGAS website.

Number of tour participants

	Standard Course	Total Trend Course	Theme Focus Course	Total
IGAS2022	333	—	197	530
IGAS2018	1,270	129	642	2,041

Details of each course and conductors

Standard Course

Compact introduction to the overall IGAS 2022 trends.

- Capacity: 12 people x 7-8 courses/day
- Duration: 50 min.

Theme Focus Course

Various themes were set and exhibitors were introduced along with specialized information.

- Capacity: 15 people x 4-5 courses/day
- Duration: 20 minutes for pre-seminar, 40 minutes for tour
- Content: Printing-related Business Explanation Course

With the spread of digital printing technology, there is a growing demand for business linked to online media and efficient data processing. In this course, cross-media, marketing, and the latest business application trends, including prepress aspects, were explained from a conductor's perspective.

Conductor		Switch Co., Ltd. Fumie Kageyama		Japan Graphic services industry association Ryohei Tanaka

Printing & finishing solutions explanation course

More than 20 years have passed since the advent of digital printing technology, and the field of printing is undergoing major changes. In this course, the latest technologies and future trends, from conventional printing technology to the latest digital printing technology and post-processing collaboration, were explained from each conductor's perspective.

Conductor		Okumura Printing Co., Ltd. Hideo Yamada		Japan Printing Academy Takeshi Yoshikawa		Value-machine International Co., Ltd Yasuo Miyamoto
------------------	---	---	---	--	---	---

INNOVATIVE BUSINESS ZONE

This themed zone offered tips for expanding printing business to small and medium-sized printing companies, print buyers, and brand owners, and several exhibitors jointly displayed and demonstrated their products. It consisted of the Small Start Area and the Industrial Printing Area.

Exhibitors

Small Start Area

- | KONICA MINOLTA JAPAN, INC.
- | Duplo Corporation
- | Toyotec Co., Ltd.
- | FUJIFILM Global Graphic Systems Co., Ltd.

Industrial Printing Area

- | KAO CORPORATION
- | RICOH JAPAN Corporation

Events

JAPAN PRINTING EXHIBITION (JPEX) Exhibiting prize winning works from top competitions

The Japan Printing Exhibition showcased all prizewinning works from various competitions held by the Japan Federation of Printing Industries and 10 member organizations for calendars, catalogs, bookbinding design, packages, etc. The Japan Federation of Printing Industries booth presented the future of sustainable "printing" through a collaboration of the 10 organizations and creators. The event was a great success, attracting the interest of a large number of visitors.

SMART FACTORY ZONE

The Smart Factory Zone, which attracted much attention at IGAS 2018, was held in East Hall 6 at IGAS 2022 with an increased number of participating companies and on a larger scale. This zone included case studies of successful users in the rapidly evolving printing industry, near-future visions by market leaders, introduction of the latest technologies by sponsoring manufacturers, and collaborative presentations by multiple companies.

THEME ZONE

In addition to the Japan Color Certification System Theme Zone, as is customary, a Research and Education Zone was set up by universities and other educational and research institutions.

Research and Education Zone

- | Laboratory of Paper Device and Eco-Friendly Material Sciences Faculty of Life and Environmental Sciences, University of Tsukuba
- | Printed Device Laboratory, Tokyo Polytechnic University
- | Laboratory of Electronich Imaging, Tokyo Polytechnic University
- | Tokyo Denki University (Omodani/Yaguchi Laboratory)
- | Japan Printing Machinery Association
- | Nagoya Institute of Technology
- | Society for the Study of Printing
- | JAPAN PRINTING ACADEMY

Japan Color Certification System ZONE

- | Japan Printing Machinery Association

IGAS 2022 official WEB site (https://www.igas-tokyo.jp/)

The IGAS 2022 website was newly opened to offer timely information for exhibitors and visitors, including various event information. The website has been enhanced with banner advertisements from many exhibiting companies.

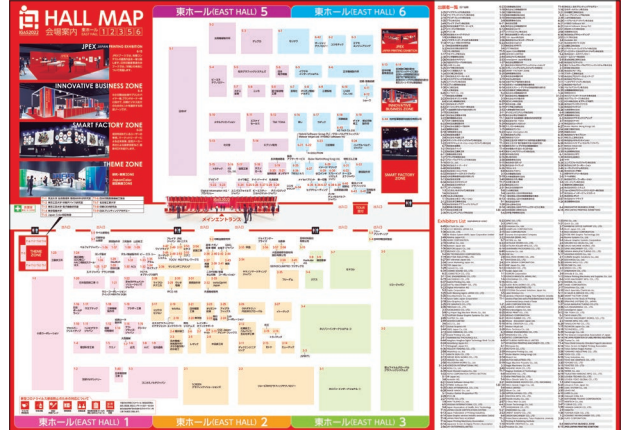

③ Daily News & VENUE MAP

This year, we distributed a new printed material integrating the DAILY NEWS and the VENUE MAP. The DAILY NEWS included "IGAS Topics" introducing the previous day's events, "IGAS Trend Commentary" explaining the overall themes and trends of IGAS 2022, and "Close-up IGAS" introducing major exhibiting companies. In addition, a detailed version of the DAILY NEWS was posted on the official IGAS website in conjunction with the DAILY NEWS. Furthermore, the DAILY NEWS article was also introduced in the "IGAS Topics" section of IGAS LIVE TV.
